

IU Attendance App

Privacy Policy

- This application uses device camera for scanning the QR code to mark the class attendance.
- The application requires the users consent to read the network state of the device to determine whether the internet is available or not. The functionality of the app solely depends on the usage of internet.
- The application uses the device information such as device id to restrict the students from marking false attendance. Only one student can mark his/her attendance from a single device. This information is used only for the authorization purpose and is never being shared with anyone for any other activity.
